VLI pharma
series

Reverse fault placement re-inspects label edits in compliance with pharmaceutical requirements

Single pass inspection easily integrated with most vision inspection systems

Fault queuing capability for high productivity

 **ROTOFLEX**

Single Pass Inspection for 100% Accuracy

Rotoflex VLI Pharma Series is a single pass inspection system for automated, high-speed verification and certification of labels. This extremely accurate and consistent solution is ideal for security-sensitive applications, including pharmaceutical.

VLI pharma series

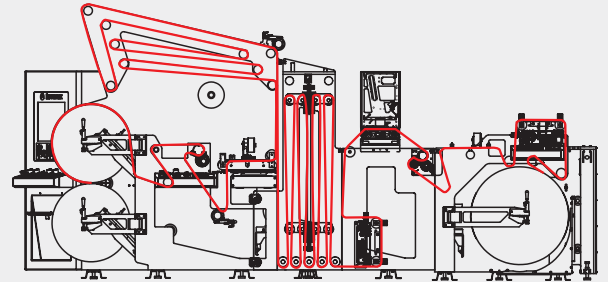

URC 2.0 Control System

- Report Management System (RMS)
- High-performance processor
- Most advanced defect detection system available
 - Independent multi-lane count
 - MMLD – 100% missing matrix and label detection
 - Precise fault placement
- Automatic calibration significantly reduces set-up time and waste

eDrive 2.0

- Better use of power which results in better roll characteristics
- Seamless roll quality at any speed and with any speed changes
- Faster acceleration and deceleration with maximum control
- Increases production effectiveness and preserves roll quality
